## About me

Like many people of my generation, I am passionate about technology and everything that surrounds it. I am a person who likes to help my colleagues and teamwork. I like to be constantly learning and I don't like the idea of standing around doing nothing. I am from Spain, and four years ago I started living in England.

## Languages

Espanish · native

Inglés · medium

## Interests

I like the nature and beeing learning constantly. I love the animals and the rock music

## Experience

### Software Developer

(Sep 2018 - jun 2018)

ViewNext

(an IBM subsidiary)

Almería, Spain

- To develop workflow and self-service automated recycling program.
- To develop business rules engine to filter criteria from web forms.

## Projects

### CloneFlix

- Learning and enjoying new skills I created a Netflix's clone developing in React. Where I could learn about typeScript, HTML, and CSS

### Pychat

- A simple app chat that I wanted to develop for two reasons: because I never had a chat app, and I wanted to learn something about the popular language of python.

### AnyWeather

- Keeping touch with React and living in London where the weather is completely crazy, I developed a app where you can ask for the weather of any city in the world. I used the openweather's API to achieve it.

## Formación

2018 Cross-Platform-App Software Developer  
Certificate of Higher Education (HNC)  
I.E.S. Al-andalus (Almería, Spain)
